## INUP- i2i Familiarization Workshop on Nanofabrication Technologies, January 19 – 21, 2022 IIT Bombay

<http://www.inup.iitb.ac.in>

In view of the tremendous success of the INUP program at IISc and IITB for the last two decades, there was intent from MeitY and readiness from the other MeitY initiated nanocenters (IITD, IITG, IITKgp and IITM) to also open up their facilities to academic users from across India. Hence, this Indian Nanoelectronics Users' Programme - Idea to Innovation (INUP-i2i), is initiated to take the 'open national nanocenters' concept to the next stage, while retaining the key aspects of training at different levels introduced in INUP. INUP has predominantly provided easy access to state-of-the-art nanofabrication and characterization facilities to researchers across the country, and has thereby created for the first time a critical mass of hands-on experimental researchers across the country in this area. The detailed information regarding the INUP program and laboratory facilities at IIT Bombay Nanofabrication Facility (IITBNF) is available on the website: <http://www.inup.iitb.ac.in>

This workshop is being organized both for familiarization and interaction of the participants with faculty members and research scholars of IITB. Online applications are invited from interested researchers from academia and R&D laboratories for participation in this workshop. The technical programme includes

- Broad area of Nano electronics
- On-going research activities at IITB
- Overview of infrastructure at IITBNF
- Availing IITBNF facilities through INUP-i2i

The workshop will be conducted in virtual mode through IT enabled platforms. The link will be sent to the selected participants.

At the end of the workshop, the participants are expected to make a presentation (1-2 slides) which describes his/her research area of interest and plan of research work under INUP-i2i work to the IITB Committee. Also, a MCQ based Quiz would be conducted based on the topics which are covered during the 3 day workshop.
